

AES 2027

Call for Papers

VENUE

War Museum of Athens
Athens, Greece

DATES

16–19 March 2027

Scope

AES welcomes original research on electromagnetic waves and their interaction with natural, artificial and structured media, from radio frequencies and microwaves to terahertz and optics. Its programme spans electromagnetic theory and computational methods, antennas and radiating structures, metamaterials and metasurfaces, photonics and nanophotonics, RF, microwave and terahertz technologies, sensing and electromagnetic systems.

Research tracks

- 1 Antennas, Radiating Structures & Propagation**
- 2 Electromagnetic Theory, Computational Methods & Inverse Problems**
- 3 Metamaterials, Metasurfaces & Engineered Wave Control**
- 4 Photonics, Nanophotonics, Plasmonics & Quantum Photonics**
- 5 RF, Microwave, Terahertz, Sensing & Electromagnetic Systems**

Submission deadline

20 January 2027

Paper format

2–4 pages contributed papers

Invited contributions: minimum 1 page

Abstract: maximum 50 words

PDF, official AES 2027 template

No separate camera-ready stage

Proceedings

Indexed in Scopus

AES Conference Proceedings

ISSN 2491-2417

Call for Papers

aesconference.org/call-for-papers/

Submit your paper by 20 January 2027 at aesconference.org/call-for-papers/

Submission guidelines

Submit a contribution of **two to four pages**, prepared with the official AES 2027 template and uploaded as a single PDF. Authors choose the length that fits their work: both are reviewed on the same criteria. The contribution should contain a short abstract of 50 words at most, a concise description of the motivation and context, the principal methods and results, and figures and references where appropriate.

Invited speakers submit a contribution of **at least one page** using the same template, through the same portal. An invitation does not replace submission: every presentation in the programme has a corresponding contribution in the proceedings. The paper submitted for review is the proceedings contribution — there is no separate camera-ready stage.

Review criteria

Submissions should make the scientific contribution readily identifiable.

Reviewers consider:

Scientific quality	Are the methods, analysis and conclusions scientifically sound?
Originality	Does the contribution present a new result, concept, method or significant advance?
Significance	Is the work relevant to AES and of potential interest to the community?
Clarity	Are the motivation, principal results and conclusions presented clearly enough for meaningful technical review?

Special sessions

Researchers are invited to propose Special Sessions addressing focused or rapidly developing areas within the scope of AES 2027. Proposals should identify the scientific theme, the organisers and prospective contributors.

aesconference.org/special-sessions/

Proceedings

Accepted contributions presented at AES 2027 are published in the **AES Conference Proceedings**, ISSN 2491-2417, indexed in Scopus.

Important dates

Call for Papers opens

22 September 2026

Submission deadline

20 January 2027

Notification of acceptance

3 February 2027

Early registration closes

12 February 2027

Conference

16–19 March 2027

Conference chairs

AES 2027 GENERAL CO-CHAIRS

Tatiana Damatopoulou

National Technical University of Athens, Greece

Odysseas Tsilipakos

Theoretical and Physical Chemistry Institute,
National Hellenic Research Foundation, Greece

AES GENERAL CHAIR

Saïd Zouhdi

Université Paris-Saclay, France
